NIKHIL BHARADWAJ

Senior Software Engineer | Full-Stack Architect | Angular & Spring Boot Specialist

Email: **nikhil.bharadwaj619@gmail.com** | Phone: +91 [Mobile Number] | Location: Bengaluru, India (Remote Available)

LinkedIn: **linkedin.com/in/nikhil-bharadwaj-n** | GitHub: **github.com/nikhilbharadwaj500** | Portfolio: **nikhilbharadwaj500.github.io**

PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of enterprise experience architecting high-throughput distributed systems, **Multi-Client handling runtimes**, **versatile Multi-Auth strategies**, reactive web applications, and mission-critical microservices. Proven track record holding **end-to-end technical codebase ownership from design to production delivery** across international supply chains, insurtech policy issuance platforms, and clinical pathology instrumentation. Deep technical expertise in **Java, Spring Boot, Angular, TypeScript, PostgreSQL, and Cloud Environments**, delivering systems with **99.9% uptime** and automated resilience.

TECHNICAL SKILLS

Programming Languages:	**Java**, **TypeScript**, **JavaScript**, **SQL**, **C# .NET**, **Python**, HTML5, CSS3 / SCSS
Backend & Security:	**Spring Boot**, **Multi-Auth Handling** (OAuth2, Md5Query, MultiHeaderAuth, HMAC), **Multi-Client Routing**, REST APIs, GraphQL
Frontend & Integrations:	**Angular**, **RxJS**, **Signals**, Reactive Forms, **3PL Integrations**, **EDI Systems**, **Accounting Integrations**, **E-Commerce**
Cloud, DB & APM:	**Render Cloud**, **Docker**, **AWS**, **SFTP Administration**, **PostgreSQL**, **MySQL**, **Dynatrace APM**, CI/CD (GitHub Actions)

PROFESSIONAL EXPERIENCE

Senior Software Engineer - **CNZ Consultants** — **06/2025 - Present | Remote (New Zealand & Australia)**

Enterprise Multi-Tenant Integration Hub, Operations Dashboard & Cloud Infrastructure — **Full Codebase Ownership**

- **Held complete end-to-end engineering ownership** of the enterprise integration ecosystem across its entire lifecycle, architecting scalable multi-client handling patterns, dynamic credential resolvers, and secure multi-tenant data segregation.
- **Designed and engineered a versatile backend Multi-Auth Handling engine** supporting diverse authentication protocols (OAuth2, Md5Query, MultiHeaderAuth, HMAC, and API keys) tailored per client and vendor requirement.
- **Architected resilient Multi-Client scheduled sync runtimes** powering **35+ automated integration schedulers** bridging **3PL Integrations**, **EDI systems**, **E-Commerce platforms**, and **Accounting Integrations** across **25+ client organizations**.
- **Architected and launched the live Angular Integration Dashboard** on Render Cloud, delivering Executive KPI tracking, multi-domain pipeline steppers (Received -> Validated -> WMS -> Dispatched), bottleneck classification, and 1-click payload inspection drawers.

Software Engineer - **Digit Insurance** — **10/2022 - 05/2025 | Bengaluru, India**

Motor Single Page Platform & Motor Bulk Loader Platform (DigitPlus) — **Tech Titan Award Winner**

- **Honored with company-wide Tech Titan Award** for technical excellence, platform architecture innovation, and dependable high-concurrency delivery under peak traffic events.
- **Architected high-conversion reactive Single Page Application (SPA)** customer journeys in **Angular**, streamlining end-to-end retail motor policy generation and reducing customer drop-off across complex insurance funnels.
- **Engineered high-throughput Motor Bulk Loader platform** in **Java & Spring Boot**, orchestrating batch policy issuance for thousands of commercial fleet vehicles with optimized ACID **PostgreSQL** transactions and async task queues.
- **Maintained 99.9% platform availability** across core production microservices by utilizing **Dynatrace APM** for distributed tracing, proactively identifying throughput bottlenecks and sub-second latency spikes.

Developer Intern - **Beckman Coulter Diagnostics** — **08/2021 - 09/2022 | Bengaluru, India**

BOND Pathology Diagnostic Software & Assistant Chatbot — **Innovation Hackathon Winner**

- **Prototyped the intelligent BOND Diagnostic Assistant Chatbot (1st Place Hackathon Winner)**, empowering clinical pathology technicians with conversational real-time troubleshooting and automated diagnostics.
- **Engineered safety-critical diagnostic UI workflows and relational persistence** using **C# .NET and PostgreSQL** for automated slide-staining instruments, adhering to rigorous medical device standards.

Software Engineering Intern - **Xon Labs** — **07/2019 - 09/2019 | Bengaluru, India**

- **Developed multi-threaded AES parallel encryption chunk processing in Java on AWS EC2**, maximizing multi-core CPU utilization and slashing bulk file encryption latency for enterprise payloads.
- **Built responsive desktop user interfaces** using Java Swing and configured web verification endpoints on AWS EC2 instances running Apache Tomcat.

EDUCATION

Master of Technology (M.Tech) in Software Engineering - **Manipal Institute of Technology (MIT)** — **CGPA: 8.48 / 10 | 2020 - 2022**

Bachelor of Technology (B.Tech) in Information Science & Engineering - **East West Institute of Technology (EWIT)** — **CGPA: 7.22 / 10 | 2016 - 2020**

HONORS & PUBLISHED RESEARCH

- **Tech Titan Award (Digit Insurance):** Recognized for core motor policy architecture and platform stability.
- **Innovation Hackathon Winner (Beckman Coulter):** 1st Place for intelligent pathology diagnostic assistant chatbot.
- **Published Research (IJSART Journal):** "Degraded Image Restoration Using SR-CNN Deep Learning Neural Networks" (Superior PSNR).

LANGUAGES

- **Kannada:** Native / Mother Tongue (Proficient)
- **English:** Full Professional Proficiency (Proficient)
- **Hindi:** Working Proficiency (Intermediate)
